Designed To Last

CompAir Portable Compressors

Designed for the most demanding conditions.
High-precision construction projects demand that the efficiency and reliability of compressors is of the highest calibre. CompAir offers a wide range of portable compressors, with a reputation within the industry for just that – compressors that meet the requirements of numerous mobile compressed air applications.

The C-Series from CompAir is constantly evolving and guarantees high energy efficiency, low emissions and many other innovations, which make daily operations and maintenance tasks much easier.

Engineering Excellence

Changing emission legislation is a key driver for development, but CompAir’s passionate engineering team also strive to achieve the best possible performance at the lowest operational costs. The C-Series of portable compressors fulfills the emission standards in accordance with the directive 97/68/EC. Additionally, the compressors are very compact and lightweight which is a preference for many customers.

The screw compression element is the most important component of the compressor. Therefore CompAir keeps the design and manufacture in-house, using the latest CNC rotor grinding machinery, coupled with online laser technology. The resulting reliability and performance ensures that operating costs will remain low throughout the life of the compressor.

GERMAN
ENGINEERING
DESIGN&MANUFACTURE

AirPlus

Tailored compressor solutions to fit your application.
CompAir offers numerous options and accessories allowing customers to configure the compressor according to the specific requirements of the application. Besides various components for air treatment, integrated generators, bundled bottom boxes, toolboxes, hose reels and integrated oilers, etc. can all be factory fitted.

Performance Protection for Portable Compressors

When you buy a CompAir C-Series portable compressor, peace of mind comes as standard now. The first of a kind Mobile 5 Warranty offers genuine performance protection for up to 5 years. The main compressor elements and controls¹ are covered at zero additional cost.

Having your compressor serviced by authorised personnel in accordance with CompAir’s maintenance schedules, ensures you enjoy comprehensive protection for up to 5 years (up to a maximum of 10,000 operating hours).

Mobile 5 from CompAir – keeping your workforce working.

¹ Terms, conditions & exclusions apply.

CompAir Genuine Parts

Enjoy complete peace of mind.
Genuine CompAir parts and lubricants ensure best performance and reliability is maintained.

- Minimum losses contributing to energy savings
- Long service life, even under harsh conditions
- High reliability

C10-12 to C14

1.0 to 1.4 m³/min
Product range
DLT 0101

C10-12 to C14 is a powerful alternative to electrical tools. Small, compact and lightweight, at only 155kg weight with 1.0 to 1.4 m³/min at 7 to 12 bar. Perfect for a wide-range of repair and installation jobs.

Electric Start as Standard
Easy to start and flexible operation.
Honda GX 630V
Air cooled petrol engine.

C20 to C30

2.0 to 3.0 m³/min
Product range
DLT 0207

The **NEW Stage V** range of Yanmar Engines delivers the power for all models within the **DLT0207** family of Compressors. The mechanically regulated Engines offer optimal performance without the need for a **Diesel Particulate Filter (DPF)**, whilst still capable to meet and exceed the current **EU Legislation** for off-highway Diesel Engines. Improved combustion chamber and fuel injection design results in a high quality product which is trusted the world over in many Construction applications. The reduced radiant noise from the Engine offers overall lower noise level performance. The inclusion of the **Oil Thermostatic valve** as standard further improves the reliability and peace of mind in all operational conditions.

Engine Speed Monitoring

The Engine will shut-down if speed is too low offering clutch protection as standard.

Bolted Single Sheets

The steel canopy is galvanised and electrostatically coated, offering excellent protection against damage and corrosion. With bolted single sheets, exchange is both quick and easy.

Fully-bunded bottom box

As standard, which retains 100% of all fluids in case of emergency leakage.

Portable-Control 2

- **Fully protected digital display**
With tamper proof hour counter
- **Indication lamps**
 - Preheat
 - Operation
 - Automatic emergency stop after malfunction
- **Start by rotary switch**
To avoid loss of time caused by lost ignition key

Yanmar 3TNV76-UDCP and 3TNV76-MCP Engines
Stage V reliability and quality as standard - both models delivering performance at less than 19kW.

Robust Control Panel protection

Protects the electronic control panel and instrumentation.

Transparent Plastic Fuel Tank

Extremely robust, the plastic fuel tank allows direct visual level indication and contamination checks to be carried out in seconds.

Progressive Volume Flow Regulation

Engine speed and air intake regulation are automatically adapted to compressed air requirement.

Air End with Spin-on Oil Filter Cartridge

For quick and easy maintenance, also improves Air Filter performance capacity and reduced pressure drop.

Internal Main Switch Board

To avoid unauthorised operation.

Central Lifting Eye

For easy handling by crane.

Operational Reliability

Designed for – 10 to + 45°C ambient temperature.

Oil Temperature Regulation Valve

Ensures safe operation of compressor at low ambient temperatures or extreme partial load as standard.

- **Automatic protection in case of malfunction:**
 - Compressor temperature too high
 - Engine oil pressure too low
 - Engine temperature too high
 - Battery voltage too low
 - Rotational speed too low
 - Cooling water too low
 - Fuel level too low

C35-10 to C50

3.5 to 5.0 m³/min
Product range
DLT 0409

The highly successful CompAir range C35-10 to C50 is driven by exceptionally quiet-running, water-cooled Yanmar 4-cylinder diesel engines. The compressor is particularly suitable for applications in cities and built-up areas, where stringent restrictions are set on noise emissions. The light construction of under 750 kg (C38 and C42 unbraked) makes the compressor suitable for many different applications and is therefore ideal for use by hire companies. These compact and lightweight compressors are available with various chassis and also with the option of integrated generator or aftercooler or both.

Soft Start

Extends the engine lifetime by reducing engine stress during start-up and allowing the engine to reach running temperature with the compressor unloaded.

Bolted Single Sheets

The steel canopy is galvanised and electrostatically coated, offering excellent protection against damage and corrosion. With bolted single sheets, exchange is both quick and easy.

Easy Access Hinged Hood

With two robust gas struts, the hood is light and easy to open, offering excellent accessibility for easy maintenance.

Yanmar 4TNV88C-DCP Engine

Common Rail system with Diesel Particulate Filter (DPF) fitted as standard to meet EU Stage V emission compliance.

Robust Control Panel protection

Protects the electronic control panel and instrumentation.

Improved Fuel consumption

Between 6% and 9% diesel fuel saving over previous models.

Portable-Control 2

- **Fully protected digital display**
With tamper proof hour counter
- **Indication lamps**
 - Preheat
 - Operation
 - Automatic emergency stop after malfunction
- **Start by rotary switch**
To avoid loss of time caused by lost ignition key

Fuel Filter

Fuel contamination is controlled by a high quality filter which includes water separation. In addition to this, every compressor has an electronic fuel pump, alarm and fuel cooler.

Air Filters

Separate air filters for engine and air compressor.

Progressive Volume Flow Regulation

Engine speed and air intake regulation are automatically adapted to compressed air requirement.

Air End with Spin-on Oil Filter Cartridge

For quick and easy maintenance.

Internal Main Switch Board

To avoid unauthorised operation.

Central Lifting Eye

For easy handling by crane.

Transparent Plastic Fuel Tank

Allows direct visual level indication and quick contamination checks.

Operational Reliability

Designed for – 10 to + 45°C ambient temperature.

Oil Temperature Regulation Valve

Ensures safe operation of compressor at low ambient temperatures or extreme partial load as standard.

Optional Filtration

According to ZTV-ING part 3 section 4.

- **Automatic protection in case of malfunction:**
 - Compressor temperature too high
 - Engine oil pressure too low
 - Engine temperature too high
 - Battery voltage too low
 - Rotational speed too low
 - Cooling water too low
 - Fuel level too low

C55-14 to C76

5.5 to 7.6 m³/min
Product range
DLT 0705

This new range of compressors stands out for its low diesel consumption, which is 10% less than the previous range. Equipped with a Diesel Particle Filter, these modern compressors are built to the latest emission standard Stage V. Thanks to a wide pressure range up to 14 bar, this compact compressor range is extremely versatile and meets the requirements of numerous applications. The compressors have enough storage capacity for two hammers, picks or any other pneumatic tools. Separate engine and compressor air filters guarantee a long service life. All of the service points are strategically located for easy access.

Soft Start

Extends the engine lifetime by reducing engine stress during start-up and allowing the engine to reach running temperature with the compressor unloaded.

Bolted Single Sheets

The steel canopy is galvanised and electrostatically coated, offering excellent protection against damage and corrosion. With bolted single sheets, exchange is both quick and easy.

Easy Access Hinged Hood

With two robust gas struts, the hood is light and easy to open, offering excellent accessibility for easy maintenance.

Yanmar 4TNV98CT-NCP

Quiet-running and low vibration 4-cylinder diesel engine with diesel particle filter.

Robust Control Panel protection

Protects the electronic control panel and instrumentation.

Portable-Control 2+

8.6 to 13.3 m³/min
Product range
DLT 1304

Designed for the toughest site conditions, whether it's for road building, civil engineering or restoration work, this range of compressors offers outstanding reliability, performance and compressed air quality. With fully accessible doors, maintenance is also made easy. The compressor as standard is equipped with numerous options, offering a substantial cost saving to the customer. Thanks to the inclusion of two batteries, reliable running and performance can be achieved even in cold conditions. The long life cycle of these compressors is further enhanced by additional engine management protection. Energy efficient Deutz TCD4.1 L4 Diesel engines are fitted with electronic fuel injection to meet the European exhaust emission standards.

Soft Start

Extends the engine lifetime by reducing engine stress during start-up and allowing the engine to reach running temperature with the compressor unloaded.

Easy Access Side Wing Doors

Offering excellent accessibility for easy maintenance.

Air Filters

Separate air filters for engine and air compressor.

Reliable, Robust and Diesel-saving DEUTZ TCD4.1 L4 Series Engine

- Fulfils stage IV and stage V of the EU emission standard.
- Diesel Particle Filter (DPF) as standard.

Robust Control Panel protection

Protects the electronic control panel and instrumentation.

Portable-Control 3

- **Digital display**
All the necessary operation data at a glance
- **Quick and easy pressure setting**
- **Fault memory with detailed operating data**
- **Automatic protection in case of malfunction:**
 - Engine oil pressure too low
 - Cooling water temperature too high

Flexible Power Management (FPM)

This function, which is available as standard, allows the user to easily scroll through the minimum and maximum pressure settings matching the pressure and output to the task. Therefore this compressor is suitable for various different applications.

Fuel Filter

Fuel contamination is controlled by a high quality filter which includes water separation. In addition to this every compressor has a manual fuel pump as standard.

24 V Electric System

Ensures sufficient power reserves in case of cold starts and a safe run-up ability.

Progressive Volume Flow Regulation

Engine speed and air intake regulation are automatically adapted to compressed air requirement.

Air End With Spin-On Oil Filter Cartridge

For quick and easy maintenance.

Internal Main Switch Board

To avoid unauthorised operation.

Central Lifting Eye

For easy handling by crane.

Plastic Fuel Tank

With direct visual level indication.

Operational Reliability

Designed for –10 to +45° C ambient temperature.

Oil Temperature Regulation Valve

Ensures safe operation of compressor at low ambient temperatures or extreme partial load.

Optional Filtration

According to ZTV-ING part 3 section 4.

- Intercooler temperature too high
- Airend temperature too high
- Engine Cooling water level too low
- Fuel level too low
- Water in fuel pre filter
- Load control (v-belt break, alternator defect)
- Hardware errors

DLT 2703

The TurboScrew compressors with their unique patented bi-turbo technology provide class-leading diesel efficiency, the lowest weight of 3,500kg and super-clean performance in accordance with directive 97/68/EC Stage V. The new range has been equipped with an award winning SCRT® – Selective Catalytic Reduction Technology system which is capable of removing almost all nitrogen oxide emissions from diesel exhaust gases.

TurboScrew Technology
CompAir's TurboScrew compression system is an innovative approach to energy conservation. It uses a Cummins turbo assisted engine powering a CompAir screw compressor unit with the addition of an engine exhaust gas drive turbine, pre-compressing the suction inlet air before it enters the compression chamber.

Small footprint & one of the lightest in class

The lightweight TurboScrew compressors can be towed by a vehicle with a maximum towing weight of 3,500kg and is great for getting to hard-to-access sites.

Soft Start

Extends the engine lifetime by reducing engine stress during start-up and allowing the engine to reach running temperature with the compressor unloaded.

Easy Access Side Wing Doors

Offering excellent accessibility for easy maintenance.

SCRT® System

Simultaneous reduction of soot particles and nitrogen oxides.

Cummins QSB 6.7

Robust 6-cylinder turbo-charged diesel engine with an additionally integrated second turbo-charger for the pre-compression of the inlet air of the compressor.

24 V Electric System

Ensures sufficient power reserves in case of cold starts and a safe run-up ability.

Bolted Single Sheets

The steel canopy is galvanised and electrostatically coated, offering excellent protection against damage and corrosion. With bolted single sheets, exchange is both quick and easy.

Potential fuel savings

Based on average site running conditions, over lifetime of 10,000 hours, fuel savings of up to 30 % can be achieved when compared with equivalent conventional compressors of this output range. This represents up to 20 % of total lifetime costs.

TurboScrew fuel savings = 20 % of lifetime cost

Compressed Air Tools

To complement our portable compressors, we offer a range of modern compressed air tools, which include various hammers, breakers, rockdrills and moles.

For further information please request our Compressed Air Tools brochure.

AirPlus - Many Options for many Applications

Built-in aftercooler
With automatic water separation. Reduces water content in the compressed air. An additional heat exchanger uses compressor oil to heat the compressed air which protects the tools from freezing.

Integrated Oiler
For optimised lubrication of the pneumatic tools.

Built-in microfilter combination
(in addition to above mentioned aftercooler) Air treatment with microfilters according to ISO 8573.1 standards including ZTV-ING 90 with residual oil content of <0.01 ppm.

Hose reel
With 20m light self-supporting hose; protects the air hose and enables fast set up of tools at site.

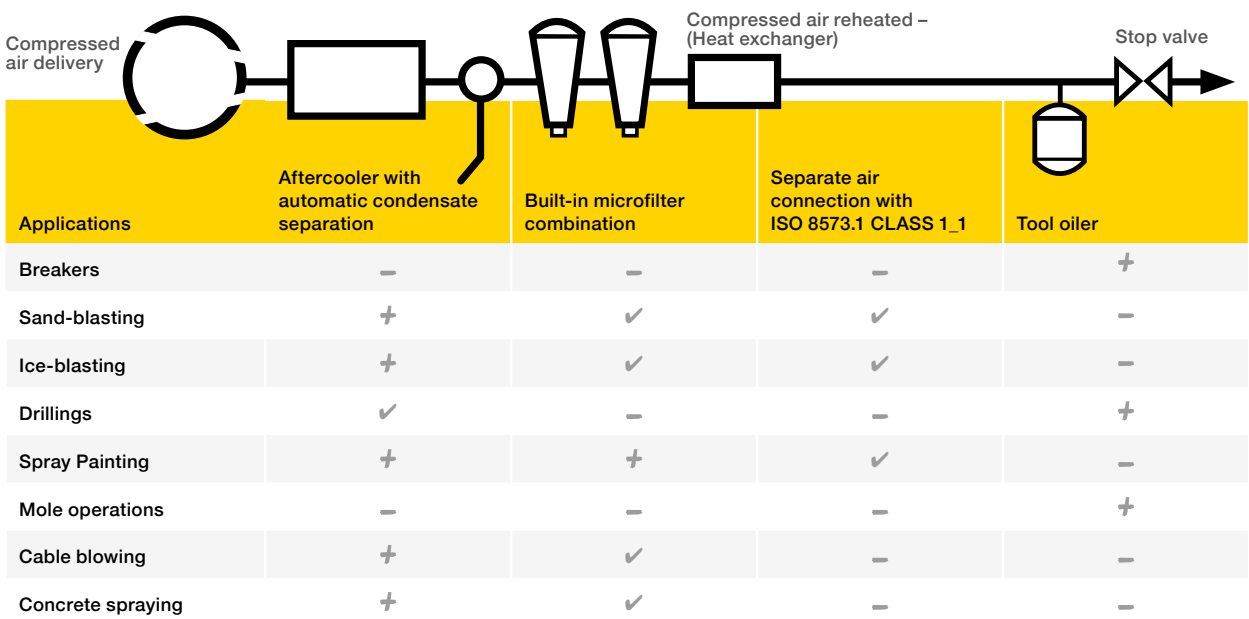

Oil temperature regulation valve
Ensures safe operation of compressor at low ambient temperatures. Prevents compressed air tools from freezing. Standard from C35-10.

Special paint colour and labelling to customer specification
Provides distinctive site identity and assists in traceability in the event of loss or theft.

 - Available for selected models

Global experience - truly local service

With over 200 years of engineering excellence, the CompAir brand offers an extensive range of highly reliable, energy efficient compressors and accessories to suit all applications. An extensive network of dedicated CompAir sales companies and distributors across all continents provide global expertise with a truly local service, ensuring our advanced technology is backed up with the right support.

Portable Compressors (EU & Non EU Range)

C10-12 - C270TS-9
1 to 27 m³/min from 7 to 24 bar

Air Plus offers many variations and options:

- Aftercooler
- Ultra-fine filters
- Integrated generator
- Bunded bottom box
- Hose reel
- Chalwyn Valve
- Exhaust spark arrestor
- Exhaust gas particulate filter
- Customer colours

Tools

- Chipping Hammers
- Rockdrills
- Pickhammers
- Breakers

Vibration damped tools:

- Rockdrills
- Pickhammers
- Breakers

Accessories:

- Large selection of pointed chisel, slat chisel and spade
- In line lubricator
- Water separator with or without oiler
- Air hoses

Services

- Technical support and advice
- Worldwide service network
- Reliable supply of spare parts
- Individual customer solutions
- Seminars and trainings
